Accessories

Useful items for the Mobeli system

- (1) **Slip-on contrast rings:** If you need assistance in recognising the grip area. Colour: Red.
- (2) Use the **snap-lock release** as unlocking aid, unlocking protection, and contrast ring.
- (3) **Tilt stop** using the safety lock. With this safety lock you can simply "lock" the Mobeli grab handle. Comparable to a padlock.
- (4) Your tiles do not have a minimum size of 14 x 14 cm? Self-adhesive Mobeli **stainless steel plates** are simply glued on where you want to attach the Mobeli grab handle – assuming you have a firm base surface.

	Best. Nr.
Tilt stop (tilting lever protection)	1402766
Snap-lock release	1402767
Slip-on contrast rings	1400672
Stainless steel plates	
Paar (145 x 145 mm)	1461414

9

QuattroPower Stütz. Firm hold without drilling – in no time at all. You position the QuattroPower support system, flip the rocker arms – that's it.

The QuattroPower support systems are designed for a maximum user weight of 80 kg. The QuattroPower handle can be mounted upwards or downwards.

With its 4 suction pads, the QuattroPower support system distributes the lever forces acting on the wall. Advantage: It can even be attached to tiled cavity walls (e.g. 2-layer plasterboard panelling). Expensive conversions for wall reinforcement so that handles can be fastened with screws are no longer necessary.

10

Support systems

Secure hold. Exactly where you need it.

Very popular near the wall is the combination of a QuattroPower support handle and a classic Mobeli handle (fixed size or telescopic).

This support system can be mounted upwards and/or downwards on both sides of the WC, for example, depending on requirements and spatial conditions. If it is attached upwards, there is an additional possibility of supporting or pulling oneself up. Our QP support systems offer a wide range of mounting options and can also be used for completely new tasks such as physiotherapy.

Space-saving minimal solution: You can convert the QP into a simple handle with 4 suction pads. The support handle is available with 26 mm handle bar diameter for children or with 35 mm in a standard version.

		Best. Nr.
QuattroPower Support	80 kg	14002 65 S
QuattroPower Support +grab horn	80 kg	14002 66 S
QuattroPower Support Kid	60 kg	14002 68 S
QuattroPower Support Kid + grab horn	60 kg	14002 69 S

11

QuattroPower Tub. Optimized for the bath tub: The Mobeli support system QuattroPower Tub is excellently suited for getting into and out of the bath tub.

It can sustain large tensile and supporting loads. Before entering or leaving the bath tub, seize the grab bar with both hands and let go of it only after you are sitting safely or standing firmly.

By the way: The QuattroPower Tub can be attached to the outside or to the inside of the bath tub and holds even under water.

		Best. Nr.
QuattroPower Tub*	80 kg	14002 63 S
QuattroPower Tub* with grip extension	80 kg	14002 64 S
QuattroPower Tub	80 kg	14002 61 S
QuattroPower Tub with grip extension	80 kg	14002 62 S

* for narrow tubs

The mobile holding system that permanently monitors the vacuum state and thus its adhesive strength.

MOBELI®

Mobile grab handles – ingeniously simple and safe.

Mobile grab handles

Stay mobile. Overcome limitations.

The patented ROTH Mobeli system has proven itself for ten years as a practical helper in everyday life for handicapped and elderly persons. The mobile grab handles are quickly and easily attached and just as easily removed. Simply press both suction pads with a diameter of 120 mm each onto a flat, non-porous surface, press down the vacuum levers – that's it.

All grab handles are manufactured with excellent workmanship and certified by the German Technical Inspection Agency TÜV Süd; they provide an enormously high adhesive strength and are available in different lengths.

The elegant CHROMELOOK Premium grab handles feature a particularly effective anti-slip drop-pearl structured surface and are the perfect complement to other chrome bathroom fittings.

Handle length in mm		Order no.
1-handed grab handle 110	105 kg	14002 20 S
2-handed grab handle 210	100 kg	14002 25 S
2-handed grab handle 350	95 kg	14002 26 S
2-handed grab handle 650	95 kg	14002 27 S
Telescopic grab handle 220-345	85 kg	14002 21 S
Telescopic grab handle 340-465	85 kg	14002 22 S
Telescopic grab handle 440-565	85 kg	14002 23 S
Telescopic grab handle 665-790	80 kg	14002 24 S
CHROMELOOK Premium version:		
2-handed grab handle 350	95 kg	14002 26 SCL
2-handed grab handle 650	95 kg	14002 27 SCL

 The mobile grab handles have been developed to support natural movement. They are not designed to carry the full body weight.

All MOBELI grab handles have been successfully tested by TÜV Süd according to the latest ISO17966:2016 standard. In the context of the new test method, the holding capability is now indicated by maximum user weight.

MOBELI®

Suction pad

The internal interlocking of suction pad and vacuum head results in a substantially higher holding strength. The suction pads, made of special rubber, are even suitable for slightly structured bathroom and WC tile surfaces.

Telescopic grab handle

We have developed the telescopic grab handle to enable you to attach your handle independently of the tile grid. The grab handles are made of extremely impact-resistant and tough plastic.

Snap-pin coupling

All Mobeli grab handles can be conveniently installed without any tools and just as easily disassembled for travelling. The snap-lock pins are made of stainless steel, as are all metal parts of the Mobeli system.

Vakuum safety indicator

This innovation is simply revolutionary. **The only mobile grab handle system that permanently monitors its vacuum state and thus its holding strength.** The Mobeli safety rocker continuously monitors the vacuum. If the warning rocker is sunk flush in the lever, the adhesive strength is correct and the grip is fully able to carry its load. If the warning rocker rises and the red edge of the rocker becomes visible, the Mobeli suction head must be released and newly fastened. The safety indication is also suitable for persons with impaired eyesight because in case of vacuum loss the risen warning rocker can easily be felt. The Mobeli grab handles were designed according to the safety and technical standards for medical devices.

CE The mobile MOBELI grab handles comply with the directive 93/42/EWG on medical devices.

3

Safety indicator

Mobile and safe. Because safety comes first.

Mobeli is the original among mobile grab handles. Our product family is constantly being further developed and enhanced. All grab handles of the Mobeli system are developed and manufactured in Germany by ROTH, a company rich in tradition.

Mobeli safety rocker: The vacuum is permanently monitored.

With the safety rocker lowered, the handle can be subjected to the full maximum user weight (specified individually for each handle).

If the red side edge of the safety rocker becomes visible, the grab handle must be loosened and re-attached. The principle: If vacuum is lost, the safety rocker extends. There is still a reduced holding strength, but the handle no longer reaches the holding strength specified for the maximum user weight. So simply loosen the handle and fix it again.

Ideally suited for travelling. Our mobile grab handles can easily be disassembled. They take up little space in your luggage and are just as easily reassembled at your destination – without any tools.

5

QuattroPlus

More mobility. At home and when travelling.

High carrying load variant: The mobile vacuum holding grip QuattroPlus can be fastened at the wall – and even across a corner – or serve as a grab handle and as a relocation aid. The QuattroPlus, patented in Europe and the U.S., can also be used by heavier people due to its high load carrying capability.

Thanks to the integrated universal joint (360° rotatable), it is even possible to attach the QuattroPlus to the frames of a room door. The prerequisite is a firm, pore-tight, flat mounting surface, e.g. a metal frame. This does not affect the maximum user weight up to 160 kg.

Handle length in mm		Order no.
QuattroPlus 200-325	160 kg	14002 41 S
QuattroPlus 320-445	160 kg	14002 42 S
QuattroPlus 420-545	160 kg	14002 43 S
QuattroPlus 645-770	150 kg	14002 44 S

6

Handrail

Flexible – the angle-adjustable handrail

The angle-adjustable handrail is the ideal aid for a barrier-free bathroom. Due to the unique horizontal-vertical combination, the mobile handrail is helpful in many everyday situations, be it in the bathtub when standing up or as a holding aid in the shower. The large radius of action and its versatility are the strengths of our mobile handrail.

Barrier-free DIN 18040 (in 5.3.5) requires a horizontal handle at a height of 85 cm as well as a vertical handle for shower areas; the angle-adjustable handrail meets all these requirements in one solution, on the right as well as on the left side.

The handrail can be turned into a grab handle for travelling in just a few seconds.

Handle length in mm		Order no.
Angle-adjustable handrail 340-465	85 kg	1400222H2 S
Angle-adjustable handrail 440-565	85 kg	1400223H3 S
Angle-adjustable handrail 350	95 kg	1400226H6 S
Angle-adjustable handrail 650	95 kg	1400227H7 S
